

Norse Atlantic Airways Selects ULTRAMAIN[®] ELB[™] for Streamlined Paperless Operations

Arendal, Norway – February 26, 2024– Norse Atlantic Airlines (Norse Atlantic), a Norwegian airline founded in 2021 and specializing in low-cost, long-haul, and direct flights across Europe, the U.S. and Asia, has selected Ultramain Systems electronic logbook, ULTRAMAIN ELB, to fully replace the aircraft paper technical log, cabin log, journey log, and fueling logs on their fleet of 15 Boeing 787 Dreamliners.

Upon implementation, Norse Atlantic's Flight Crews will operate ULTRAMAIN ELB iOS version on iPads. This transition from paper to digital line maintenance operations marks a significant step forward for Norse. Real-time Flight and Cabin Crew reports, selected from ULTRAMAIN ELB's on-device B787 tailored fault repository, will enable enhanced planning and defect clearance. This will lead to lower deferral rates, increased operational service levels and lower maintenance costs across their Dreamliner fleet.

"We are delighted to welcome Norse Atlantic to the ULTRAMAIN ELB user community, marking a significant milestone in our expansion into Norway. At Ultramain Systems, we take pride in delivering solutions that not only streamline workload and enhance operational efficiency for

our customers but also contribute to their environmental sustainability efforts, and we're excited to support Norse Atlantic in their journey," said Mark McCausland, President, and CEO of Ultramain Systems.

“Going paperless has been a goal for Norse Atlantic’s technical department since our start up, as it will help streamline our operations, improve cost efficiency, and contribute to our sustainability goals. Choosing Ultramain represents a significant milestone in realizing our paperless vision”, expressed Ahmad Abu Nima, VP Technical Operations at Norse Atlantic Airways.

About Norse Atlantic Airlines

Norse Atlantic Airways (hereby ‘Norse Atlantic’), founded by CEO and major shareholder Bjørn Tore Larsen in March 2021, is an airline specializing in low-cost, long-haul, direct flights to a range of exciting destinations on the intercontinental market, offering passengers more opportunities and flexibility to explore the world.

Headquartered in Arendal, Norway, Norse Atlantic ASA, a publicly traded company listed on the Euronext Expand Exchange in Oslo, Norway, is the parent company of Norse Atlantic Airways AS and Norse Atlantic UK LTD.

Norse Atlantic Airways AS holds two Air Operator’s Certificates (AOCs), one in Norway and one in the UK.

Norse Atlantic fleet includes 15 modern, fuel-efficient, and more environmentally friendly Boeing 787 Dreamliners that serve destinations including New York, Los Angeles, Miami, Orlando, Jamaica, Barbados, Bangkok, Oslo, London, Berlin, Rome and Paris. The company’s first flight took off from Oslo to New York on 14th June 2022.
